

Power Supply

Shenzhen Sensor Electronic
Technology Co.,Ltd

CE-WYS-2

Input voltage: 220V ± 10%, 50HZ;

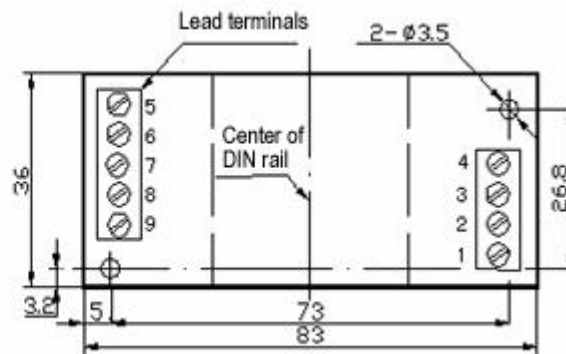

Features

High stability, low drift and strong resistance to the interference.

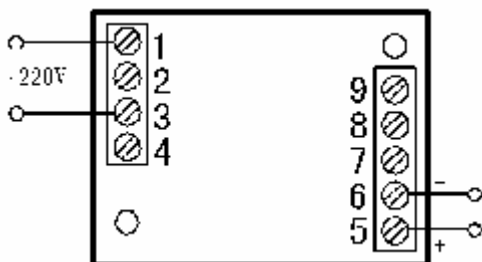

Specifications

Operating temperature: -10~50°C
Input voltage: 220V ± 10%, 50HZ
Rated Current Output: 200mA
Output voltage: 12V, 15V, 24VDC
Output ripple: ≤10mV

Case Style & Mounting Dimensions

Connections Diagrams

Terminal 1: 220V
Terminal 3: 220V
Terminal 5: DC output +
Terminal 6: DC output -

Notice

- If a group DC power sources are mounted together, keep a space more than 10 mm between adjacent units
- Don't disassemble the DC power sources. Please avoid impact or fall down from a high place. Do not remove or destroy the labels on the products.
